Introduction

The thirst for learning, upgrading technical skills and applying the concepts in real life environment at a fast pace is what the industry demands from IT professionals today. However busy work schedules, far-flung locations, unavailability of convenient time-slots pose as major barriers when it comes to applying the concepts into realism.

And hence the need to look out for alternative means of implementation in the form of ladder approach.

The above truly pose as constraints especially for our students too! With their busy schedules, it is indeed difficult for our students to keep up with the genuine and constant need for integrated application which can be seen live especially so in the field of IT education where technology can change on the spur of a moment. Well, technology does come to our rescue at such times!!

Keeping the above in mind and in tune with our constant endeavour to use Technology in our training model, we at Aptech have thought of revolutionizing the way our students learn and implement the concepts using tools themselves by providing a live and synchronous eProject learning environment!

Acknowledgment

First of all, we would like to thank Almighty Allah for giving us strength and ability to complete this project and then, we would like to express my special thanks of gratitude to our teacher SIR MUHAMMAD ANIQUE ..who guided us on the project which also helped us in doing a lot of new learning and we came to know about so many new things we are really thankful to him. We are highly thankful to SIR MUHAMMAD ANIQUE for his guidance and constant supervision well as for her support in completing the project Lastly, we would also like to thank our parents and friends who helped us a lot in finalizing this project within the limited time frame. We also express our sincere gratitude to I-Project team from Aptech Head Office, for their valuable guidance and support for the completion of this project. We earnestly hope that this project will provide all the necessary information required by the user to fulfill his/her inspiration. However, suggestion and feedbacks for improvements will be thankfully welcomed & acknowledged.

So what is this eProject?

eProject is a step-by-step learning environment that closely simulates the classroom and Lab based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that

allows you to

- o Practice step by step i.e. ladder approach.
- o Build a larger more robust application.
- o Usage of certain utilities in applications designed by user.
- o Single program to unified code leading to a complete application.
- o Learn implementation of concepts in a phased manner.
- o Enhance skills and add value.
- o Work on real life projects.
- o Give a real life scenario and help to create applications more complicated and useful.
- o Mentoring through email support.

The students at the centre are expected to complete this eProject and send complete project along with the documentation to eProjects Team
Looking forward to a positive response from your end!!

Objectives of the project

The Objective of this program is to give a sample project to work on real life projects. These applications help you build a larger more robust application.

The objective is not to teach you HTML/JavaScript/CSS/BOOTSTRAP but to provide you with a real life scenario and help you create basic applications using the tools.

You can revise the chapters before you start with the project.

This project is meant for students who have completed the module of Dreamweaver. These programs should be done in the Lab sessions with assistance of the faculty if required.

It is very essential that a student has a clear understanding of the subject. Students should go through the project and solve the assignments as per requirements given. Kindly get back to eProjects Team in case of any doubts regarding the application or its objectives.

Problem Statement

Wonders of World (WOW) website will present the information about the various wonders. The information behind this creature must be added. The information of

historic places can be categorized. The link of seven wonders, Gallery section, Contact Us, Feedback and Site Map must be added

The website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.

Frequently Asked Question

What are the New Seven Wonders of the World?

The New Seven Wonders of the World are iconic monuments recognized for their architectural brilliance and historical significance. They include the Great Wall of China, Petra, Christ the Redeemer, Machu Picchu, Chichén Itzá, the Roman Colosseum, and the Taj Mahal. These wonders showcase the creativity and cultural heritage of ancient civilizations.

Can I visit all the wonders in one trip?

How can I plan my visit to the wonders?
